The **Belgrade Energy Forum 2024**, the annual flagship conference of the **Balkan Green Energy News** portal, will be held on May 13-14, 2024, at the Crowne Plaza Hotel in Belgrade.

Built on the success of the 2023 conference edition, which had more than 400 participants from 28 countries, including the high-level participation of three ministers of energy, two advisors to PMs, and directors of regional and EU institutions, the conference in May will be the place where the leaders of Southeast Europe's energy transition will meet.

BEF 2024 will bring together decision-makers from the region and Europe, industry associations chiefs, CEOs and board members of regional power utilities and power exchanges, investors, project developers, financial institutions, technology providers, leading consultancies and law offices, power traders, companies for innovative services and digital solutions.

The first league of the region's energy transition and those who aspire to join it will gather in Belgrade for the Belgrade Energy Forum 2024.

**Secure your place in time as a participant or sponsor and be part of the most important energy event in the region for 2024.**
